QPR ScoreCard

**Let us help You to take
control of Your Processes
and achieve Your Goals**

QPR offers software for solutions and services in the areas of performance management, process modeling and analysis, risk management and compliance. Our software supports the use of all main management methods and tools. It is applicable to all industries and to the needs of the private as well as the public sector.

QPR Software's offering is composed of out-of-the box software for process and performance management. The most tangible benefits of QPR's software and solutions and services based on it, are related to process and performance improvement, strategy execution, risk and quality management actual at all times. In addition, QPR software allows the customers to engage all their personnel in the execution of chosen management practices

Quality management

Teknosa is the leading home electronics retail chain in Turkey with 225 outlets in 58 towns. Teknosa secures the quality of its customer service with QPR software. With help of QPR software Teknosa received the ISO 9001 quality certificate and won the Turkish national quality award.

Process Management

The rapidly internationalizing Peikko Group has chosen to succeed in the international competition by means of quality and operational excellence. To achieve this, it has decided not merely to model processes but also to manage them. As the tool for this they chose QPR ProcessGuide. Thanks to the shared process models, the internal discussion has achieved a new level. Making new policies, discussing them, agreeing on new rules and improving existing ones has become easier when members understand better the different points of views in the organization.

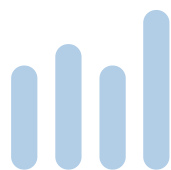

QPR software localized to 26 languages

QPR software is used by 1,500 customers around the world in both the private and public sector.

Customer organizations systematically develop their processes and performance with QPR software. Customers may also use the software to comply with regulated requirements and standards or to manage operational changes entailed by compliance with the regulation.

QPR software is easy to use and it brings immediate benefits, improves decision making, and promotes process competence to the whole organization. It scales from individual usage to systems covering entire organizations. QPR software can process a vast amount of data and connects easily to customers' existing IT systems like Microsoft-, Oracle- or SAP databases.

QPR software is fast to implement and adjusts well to customers' changing management methods. The software is mainly used through the QPR Portal, a web-based and customized interface to all QPR software products. QPR's software is localized to 26 languages. QPR offers customer care service to all maintenance customers.

QPR

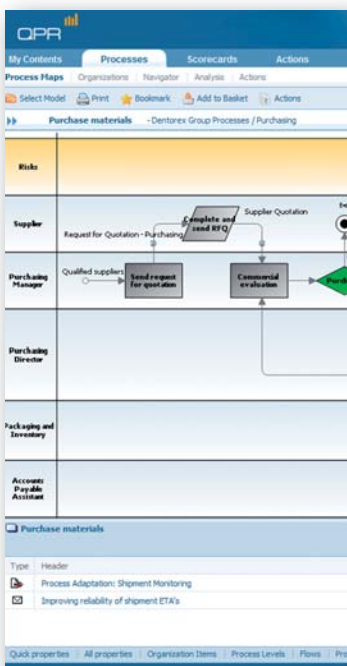

QPR ScoreCard for strategy and performance management.

QPR ScoreCard is a comprehensive server-based software for strategy as well as performance management, allowing for the design, implementation, communication and assessment of an organization’s strategy as well as commitment of members to goals. The software facilitates the monitoring of the main financial and non-financial measures and efficient management reporting.

QPR ProcessGuide for professional process modeling and analysis

QPR ProcessGuide is a comprehensive server-based software package for process modeling and analysis. It is instrumental for rapidly reaching full benefits in process management. QPR ProcessGuide is especially designed for hierarchal process modeling. The built-in full support for the BPMN process modeling standard enables automatic transfer process descriptions to systems executing processes.

QPR ProcessGuide integrates with QPR ScoreCard and together they provide business and operational key performance indicator dashboards in real time.

Start modeling immediately with QPR ProcessGuide Express

QPR ProcessGuide Xpress is the desktop version of QPR ProcessGuide. QPR ProcessGuide Xpress provides consultants, analysts, architects and process owners a powerful process modeling, documenting and analysis tool that is as easy to use as office productivity tools. With QPR ProcessGuide Xpress you create, maintain, and navigate process information drastically faster than using business graphics tools

Compatibility with Microsoft software enables powerful collaboration and management

QPR has chosen the Microsoft ecosystem as the platform to specialize in. QPR’s software products are fully compatible with MS products. QPR is a Microsoft Gold Certificated partner and QPR software offering is fully compatible with Windows 7.

The integration of QPR ProcessGuide to MS Office and MS SharePoint allows easy process discovery of existing assets. The QPR Solution Package for Microsoft Office SharePoint Server enables powerful collaboration and management. The QPR Add-In for Microsoft products integrates reporting with MS Word. The possibility to export data to MS Excel adds many capabilities for performance and process analysis.

QPR – not just software!

QPR specialists and its international resellers have a wide experience in improving business processes as well as in building risk management and performance management systems. Furthermore they have acquired a strong experience-based knowhow from best practices regarding the deployment and actual use of these systems.

Solutions based on QPR software are replicable and often industry-focused comprehensive offerings. Typically they include QPR software licenses for a specific solution, ready to use methods or industry-specific measure libraries, examples of processes and an implementation project related to the solution in question.

Global reach through partner network

QPR Software serves its customers as a comprehensive solution provider directly in Finland, Russian Federation and in CIS countries.

QPR Software co-operates with an extensive network of local partners in over 50 countries worldwide.

Most QPR partners are management consultants, system integrators, software suppliers or combinations of these. When needed, QPR can also support projects taking place in more than one country through the network. You can find the nearest reseller to You from the Partners' section of the www.qpr.com home site.

QPR Software offers a four-step program to partners. Through the program QPR promotes software sales by training, and incentivizing its partners. Partners, on their part, gain access to QPR's knowhow and experience from other local markets.

Performance management

AB-Inbev, one of the worlds' top-five consumer products companies manages a portfolio of over 200 brands, including Budweiser and Stella Artois. It manages its complete global supply chain with a Cost-to-Service solution based on QPR toolset . The toolset allows Ab-Inbev to easily identify profit optimization opportunities.

Strategy implementation

Serving over 300 customers in 45 countries and producing a million tones of finished aluminium products annually, Dubai Aluminium sought an effective means of automating and up-scaling its Balanced Scorecard implementation. It chose QPR ScoreCard, as "without a doubt" Dubai Aluminum recognized it as the best tool for this purpose available in the industry today.

CNOOC SES, the subsidiary of one of the largest state owned oil and gas producers in China and operating off the coast of Indonesia was seeking a means to optimize throughput while maintaining the highest level of safety standards for its personnel. It chose QPR ScoreCard for ensuring the proper execution of strategy while at the same time managing the organization's performance in safety levels.

Read more how our customer have succeeded and received their targets with the help of QPR software at the Customers' section of our www.qpr.com home site.
