# QPR ProcessAnalyzer

## Discover.
## Optimize.
## Automate.

**BOOK A DEMO**

## Process Mining: The fast track to improved business

The goal of improving operational efficiency or ensuring process compliance can feel overwhelming - especially if you don't have access to accurate insights into how your company works. Our process mining tool draws data directly from your information systems (e.g. ERP, CRM, or BPM). It then visualizes and analyzes process flows that take place in your organization – for example, how different units are performing, which process steps are taking too long now or will be late in the future, or where processes aren't complying to regulations.

QPR ProcessAnalyzer's leading root cause analysis, AI-based clustering analysis, and predictive machine learning capabilities allow you to get a holistic understanding of your processes – including any **unnecessary rework, compliance violations, bottlenecks,** **and unutilized automation opportunities.** QPR ProcessAnalyzer's clear user interface ensures an easy way to measure and report findings. At the same time, you build the courage to make the right fact-based decisions.
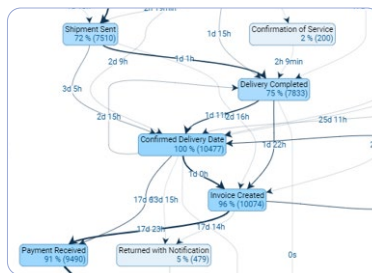

### DISCOVER PROCESSES

See your as-is processes visualized in real-time, create dashboards, and use root cause analysis to find reasons to inefficiencies.
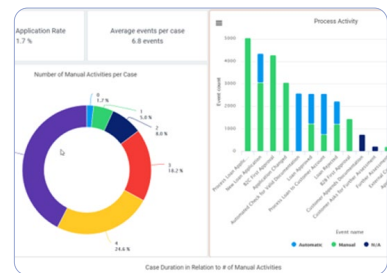

### OPTIMIZE PROCESSES

Anayze your process flows to understand variations, unnecessary rework, and bottlenecks - identify the best processes to optimize.

### AUTOMATE PROCESSES

Identify the most profitable processes for automation, monitor automation rates, and utilize predictive machine learning notifications.

# Enterpise Compatibility

- On-premise or Cloud (hosted on AWS)
- Federated authentication
- Audit logs
- In-memory processing
- Limitless data use
- Case-specific access permissions

# Flexible Data Collection

- A variety of connectors: SAP, Salesforce, Oracle, ServiceNow, Microsoft Dynamics,...
- Open APIs
- Integration Platform for ETL
- Connect to both modern and legacy systems
- Automated real-time loading
- No data use limits
- In-memory flash models

**KBC**   **Caverion**   **IMPLEMENT** CONSULTING GROUP_   **NOKIA** CONNECTING PEOPLE   PIRAEUS BANK   MetsäBoard

## Customer benefits:

- **Piraeus Bank** cut their loan application process from 35 minutes to 5 minutes on average by fixing their process automation problems

- **Metsä Board** increased their order lines by 60% with the same headcount by focusing process improvement activities to the right areas

- **EY UK** got a holistic view of all business processes, with 100% coverage of all transactions and root causes of inefficient problems, allowing them to predict errors and prioritize actions based on risk

- **Terumo Europe** built a complete x-ray of their processes, which helped them focus on fact-based and value-added decision making
